EXAMINER INTERVIEW SUMMARY

Applicant's undersigned attorney and Applicant's agent (Neal E. Persky, Reg. No. 53,452) conducted a phone interview with Examiner Ralph A. Lewis on April 21, 2005. In the interview, the outstanding office action (including the rejections and objections therein), the prior art, and the claims were discussed. Applicant respectfully submitted (and continues to submit) that the cited art does not render Applicant's claims unpatentable. The art discussed included the cited reference entitled "Endoventricular Patch Reconstruction in Large Ischemic Wall-Motion Abnormalities," J. Cardiac Surg. 199:14:46-52) by V. Dor et al ("Dor"). Applicant respectfully submitted (and continues to submit) that the claims are patentable over the prior art, including Dor, because such art does not teach or suggest the combinations of features in Applicant's claims.

The objections to certain claims were discussed, including claims 318 and 334. The

Atty. Dkt. No.: 5838-00300

Office Action objected to, for example, claims 318 and 334 as "confusingly out of order from that disclosed in the specification." Applicant respectfully disagrees with this objection. Applicant did not and does not intend to imply any specific order to the features within claims, unless a specific order is delineated/required by the language of the claims. Applicant respectfully submits that features in Applicant's claims can, in many instances, be present/performed in different orders than the specific order of the features in the claims, without departing from the scope and spirit of the claims and the disclosure. The Examiner indicated that this objection would be withdrawn.

To expedite prosecution of the present application, the following actions were discussed:

1. Amending claims 410-421 and 423-424 to be dependent upon allowed claim 278 instead of claim 402, and
2. Canceling claims 246-253, 262-277, 286-301, 310-317, 327, 335-336, 342-371, 402-409, 422, 427-429, 431, 483, and 486-571 without prejudice.

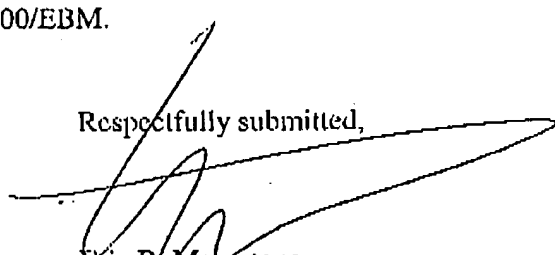

The Examiner indicated that if the above actions were taken, then he would consider issuing a Notice of Allowance. The Examiner indicated that he would enter the above actions in an Examiner's Amendment. After such actions are taken, Applicant submits that the allowable claims would include claims 254-261, 278-285, 302-309, 318-326, 328-334, 337-341, 372-401, 410-421, 423-426, 430, 432-482, and 484-485.

In addition, the information disclosure statements filed in this case, and the submitted Forms 1449, were discussed. The recently filed "REQUEST FOR SIGNED FORMS PTO 1449" and the recently filed Information Disclosure Statement were discussed. The Examiner stated that he would consider the Information Disclosure Statement, and include signed forms PTO 1449 with the next paper issued by him in the case.
